1. Identification & Weights (The "Context")

Field Name	Description	Data Type	Role in CLV Model
common_id	Unique Household Identifier (Concatenated)	String	Primary Key (Not for Training)
State / District	Geographic Location Codes	Integer	Regional Economic Context
Sector	Rural (1) or Urban (2)	Integer	**Critical Feature**: Lifestyle Tier
Multiplier	Sampling Weight	Float	**Sample Weight**: Ensures national representation

2. Household Demographics (The "Who")

Field Name	Description	Data Type	Role in CLV Model
head_age	Age of the Household Head	Integer	**High Importance**: Spending Horizon
head_gender	Gender (1=M, 2=F, 3=T)	Integer	Behavioral Segmentation
head_marital_status	Marital Status (1-4)	Integer	Life-stage Indicator
head_education_level	Highest Education attained	Integer	**Wealth Proxy**: Future Earning Potential
HOUSEHOLD_SIZE	Total number of members	Integer	Per-capita denominator

3. Socio-Economic Signals (The "Status")

Field Name	Description	Data Type	Role in CLV Model

Household_Type	Occupation/Income Source	Integer	Income Stability Signal
Land_Owned_Acres	Total land possessed	Float	**Asset Proxy**: Rural Wealth Signal
Ration_Card_Type	Type of Welfare Card	Integer	Economic Bracket Indicator
Energy_Cooking	Cooking Fuel Source (LPG, etc.)	Integer	Standard of Living Marker
is_digital_hh	Household uses Internet (Yes/No)	Binary	**Modernity Signal**: Digital Maturity

4. Consumption & Behavioral Signals (The "How they Spend")

Field Name	Description	Data Type	Role in CLV Model
food_spend	Monthly Expenditure on Food	Float	Baseline Survival Signal
intoxicant_spend	Spend on Pan, Tobacco, etc.	Float	Habit-based Discretionary Spend
online_score	Freq. of Online Purchases	Integer	**High Importance**: Digital Affinity
asset_score	Count of high-value assets owned	Integer	Cumulative Wealth Proxy
Free_Items_Count	Count of welfare-received items	Integer	Welfare Bias Adjustment
total_basket_value	Monthly Affordability of items	Float	**Monetary Signal**: High-ticket intent
total_unique_items	Variety of Items purchased	Integer	**Frequency Proxy**: Consumer Diversity

5. Summary Expenditures & Target (The "Value")

Field Name	Description	Data Type	Role in CLV Model
Monthly_Durable_Exp	L15 Section A2 Summary	Float	Monthly Durable outflow
Monthly_Services_Exp	L15 Section B2 Summary	Float	**Service Stickiness Signal**
Monthly_Misc_Exp	L15 Section C2 Summary	Float	Education/Medical Investment
total_hh_exp	Final Monthly Household Total	Float	Absolute Wallet Size
target_mpce	Monthly Per Capita Expenditure	Float	**TARGET VARIABLE**

- ****Estimated CLV = (Predicted MPCEx 12)x Expected Remaining Years****

- ****Expected remaining Years = Based on Life expectancy Table From SRS Life table Mapping****
